BIGGEST DAY
ON RAILROADSunday Broke the Record on the
"Middle Division," L. & N.FORTY FREIGHTS AND TWENTY
PASSENGER TRAINS IN 24 HOURS

Sunday was the biggest day ever, on the Henderson division of the L. & N., for the movement of trains between Earlington and Guthrie, which is called the "Middle Division". Running South out of Earlington there were 21 freight trains, 3 of which were double-header freight trains, equivalent to 24 freight trains. These 24 freight trains carried 424 loads and 37 empties. There were 20 passenger trains operated during the 24 hours. Taking the north end, there were 14 freight trains, 2 of which were double headers, equivalent to 16 trains. And this broke all past records. There were plenty of locomotives here and plenty of crews and for a time there was plethora of business that made things hum. After all this is a busy division and a busy town.

The Editor Won.

The editor of the Hardemen, County Free Press thus tells of an interesting experience:

"We fell asleep in a chair at Grand Junction last Wednesday night on our way home from Memphis in our usual soaked condition and let our train leave us. The hotel clerk told us to go up stairs and take the room on the right side of the hall with the lamp burning low. He said he was crowded and we would have to double up with a man. We went up and pulled off our things and went to bed without waking our bedfellow, who was sleeping sound, with the sheet over his head to keep off the mosquitoes. Before we fell into the hands of morphia we seen a young lady and young gentleman come in and sit down by the window. At first they talked so low we could not hear what they said. Finally we heard the little Miss say "Willie ain't yob ashamed to try to kiss me right here where we are sitting up with a dead person?" We felt curious. We slowly reached over and touched the nose of the man we was in bed with, and seen at a glance that he was dead all right. We riz up instantly and it was a race to a finish twist us three for the bottom of the steps. It is needless to say we was fust past the post by two lengths. We didn't skeer the couple any wusser than the corpse skeered us. We walked through the country to Bolivar and wired for our clothes by express."

Kill More Than Wild Beasts.

The number of people killed yearly by wild beasts don't approach the vast number killed by disease germs. No life is safe from their attacks. They're in air, water, dust, even food. But grand protection is afforded by Electric Bitters, which destroy and expel these deadly disease germs from the system. That's why chills, fever and ague, all malarial and many blood diseases yield promptly to this wonderful blood purifier. Try them, and enjoy the glorious health and new strength they'll give you. WOULD DIVORCE
SECRET HUSBAND

Married in Evansville 10 Months Ago.
Suit Just Now Reveals the Fact.

Clay, Ky., Jan. 21.—Much surprise was occasioned when Ledyce Ozart, by her attorneys Baker & Baker and Harris & Blackwell yesterday filed a petition in the Webster circuit court asking for an absolute divorce from Herman Z. Clark.

This is the first intimation that the public has had that the young people were man and wife. The facts seem to be as follows: Some time in the early part of 1910 the young people arranged for a marriage, which fact became known to their parents, who, rather than have them elope, agreed to the union, and accompanied them to Evansville, Ind., on March 5, where they were married, it being agreed, however, between all the parties that the bride became of her tender years, should remain with her parents for at least a year, and the groom should continue to live at the home of his parents. It was further agreed that they would continue to be seen together as formerly, but would not make engagements, and go with other young people.

The young bride is well known in this city having lived here with her parents several years.

Remarkable Record Made by an Old
English Steam Engine.

The walking beam engine of an English iron-working establishment speaks eloquently of the thoroughness of the old machine builders. It began work in 1854, with a cylinder of 4 by 8 feet, and a speed of 14 revolutions per minute under a steam pressure of 80 pounds per square inch. In 1898, it was compounded, the pressure being increased to 120 pounds. In 1910 it was found to be still to valuable a servant to retire, and it was converted into a tripple-expansion engine, which now works with steam at a pressure of 200 pounds superheated to 430 degrees. Some years ago the engine "ran away," acquiring such speed as to burst the rope-driver pulleys, yet was very little damaged.

NO GREAT deed is done by falterers who ask for certainty.—George Eliot.

THE USUAL WAY.

She was a woman, worn and thin,
Whom the world condemned for a single sin;
They cast her out of the king's high way
And passed her by as they went to pray.

He was a man and more to blame,
And the old world spared him a breath of shame;
At his feet he saw her lie,
But he raised his head and passed her by.

They were the people, who went to pray,
At the temple of God, on the Sabbath day;
They scorned the woman and for gave the man,
It was ever thus, since the world began.

Time passed on and the woman

died.
On a cross of shame was crucified;
The world was stern and would not yield,
And they buried her in the potter's field.

The man, too, died and they buried him,
In a walnut casket, with a silver rim;
And said, as they turned from his grave away,
"We've buried an honest man to-day."

Two mortals knocked at heaven's gate,
And stood side by side to know their fate;
He carried a passport with earthly sign,
And she a pardon from Love divine.

Oh, ye, who judge between virtue and vice,
Whom think ye entered the paradise?
Not he whom the world said would win,
For the woman alone was ushered in.

Up to the present time over thirty conversions have been reported to say nothing of the far reaching influence of the meeting in the lives of scores of others who have been cold and indifferent heretofore. Rev. Wimberly is a wonderful preacher and takes high ranks as a successful revivalist.
